

Elke's Healing Salve

Thank you for choosing to purchase one of my products. As with all products containing Essential Oils, please check ingredients if you have any sensitivities to certain Oils. Generally contraindications for Essential Oils refer to when the Oil is used at 100% strength. My products are always heavily diluted in a base product such as Shea Butter; Moisturiser; Shampoo Base etc. If you are unsure, please check with your doctor before using any of my products.

This product is made from the very best Essential Oils and Virgin Shea Butter to ensure it is of the highest quality. It has very high quantities of essential oils rich in anti-fungal; anti-bacterial; and anti-septic qualities, as well as an analgesic to assist with pain. These include *Oreganum Vulgare*; Clove Bud and Tea Tree Oil.

Oil of Oregano (*Oreganum Vulgare*) - The health benefits of Oil of Oregano can be attributed to its properties as an anti-viral, anti-bacterial, anti-fungal, anti-parasitic, anti-oxidant, anti-inflammatory, digestive, emenagogue and anti-allergenic substance. Its chief components are Carvacrol, Thymol, Cymene, Caryophyllene, Pinene, Bisabolene, Linalool, Borneol, Geranyl Acetate, Linalyl Acetate and Terpinene.

The disinfectant and antibacterial properties of Oil of Oregano were first recognized in ancient Greece where it was often used for treating bacterial infections on the skin or in wounds; and it was also employed to protect food from bacteria. It is a plant native to higher altitudes and normally grows in the mountains, which is how it got the name "Oregano", which means "Delight of the Mountains".

For Fowl Pox, apply at night while the birds are asleep, and then first thing in the morning.
For Greasy Heel, thoroughly clean & dry the affected area, and pick scabs off, prior to use.

The Healing Salve has been used very successfully for the following ailments:

- Fowl Pox (Chickens)
- Greasy Heel (Horses)
- Bleeding and cracked teats (Cows)
- Steam burns, sunburn, bites, cuts & abrasions (Humans)
- Skin Irritations; Eczema; Lip Balm & Nappy Rash (Humans)
- Skin Allergies (Dogs & Cats)
- Hot Spots & Fly Strike (Dogs)

Shea Butter melts in your hand, so if you find it is too hard when you take it out, just leave it between your fingers for a few seconds. Due to it's ability to be quickly absorbed into the affected area, it is not greasy. This stops it attracting dirt when used on outdoor pets. Store below 24 degrees. Apply as required.

Please note: Individual results may vary.

Prices: 50 grams = \$16.50; 100 grams = \$30.00; 250 grams = \$60.00. Postage = \$10.00 for under 500 grams.

Payment can be made by Paypal or direct deposit or via the website.
